Dear Sir/Madam,

I am wanting to apply for the position of the senior data scientist. With my relevant educational background and working experience, I believe that I am eligible for this position.

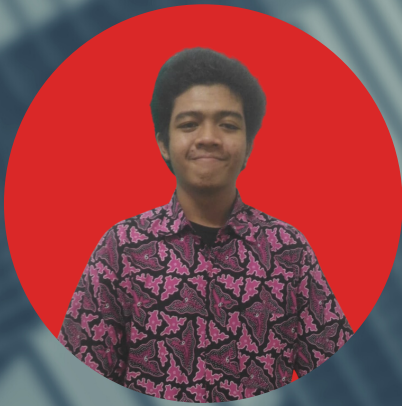

I have just graduated from Nanyang Technology University, majoring in Data Science. During college, I had internships in several multinational companies so I have a lot of experience in this field. I am also very proficient with SQL, machine learning, and python.

During my studies, I have also helped multinational companies develop their businesses by presenting useful data for business development and providing advice on decision-making from that data. During the pandemic, I have also helped the local community register anyone who needs help.

Together with this letter, I am enclosing my curriculum vitae for your inspection. Please feel free to contact me at 085718871773 at your convenience. I look forward to hearing from you.

Yours faithfully,

Nugraha Adhitama
